Back-end: Java, NodeJS,
REST API, PHP, Python
Databases: MySQL,
PostgreSQL, MongoDB,
SQL Server
Version control: Git
Responsive design
UI/UX design

PROFILE

A 23 years old learner proficient in a wide array of web technologies, dedicated to crafting captivating websites. A collaborative team member consistently delivering outstanding results, even under tight deadlines. Committed to continuous growth, always eager to enhance technical expertise. Actively searching for opportunities to make a meaningful impact as a full stack developer.

EXPERIENCE

Full Stack Developer

Gainn Fintech Pvt. Ltd

Jan 2023 – June 2023

As a Full Stack Developer, I completed impactful projects, designing a CRM system and a WhatsApp bot to enhance communication and automate processes. Leveraging my proficiency in front-end technologies such as HTML, CSS, and JavaScript, I crafted intuitive user interfaces with ReactJS, ensuring a seamless and engaging user experience. On the back-end, I implemented robust server-side logic using frameworks like ExpressJS and honed my skills in database management with MongoDB, and SQL Server.

Full-Stack Web Developer Intern

Insistence Technologies Pvt. Ltd

Jan 2021 – June 2021

During my graduation internship, I handled two key projects: a Car Rental System and an E-commerce System featuring personalized recommendations and streamlined order processing. These experiences honed my skills in system development and database management.

EDUCATION

MET ICS Mumbai

2021 – 2023

Masters in Computer Application
8.43 CGPA

SGBAU Amravati

2018 – 2021

Bachelors in Computer Application
8.02 CGPA

CERTIFICATE

AWS Academy Graduate
Data Analytics
Issued Oct 2022

Oracle
Java Programming
Issued Oct 2022

PROJECTS

- **WhatsApp Bot** 🔗 – Created a responsive and interactive WhatsApp bot using Node.js and Express, seamlessly integrated with SQL Server for efficient data management. This innovative bot enhances user engagement and automates processes, showcasing my proficiency in Node.js, Express, and SQL Server for impactful solutions within the unique context of WhatsApp.

- **Crowdfunding Platform** 🔗 – Crafted a Crowdfunding Platform with a versatile tech stack, utilizing ReactJS for the frontend, Solidity for smart contract development, Node.js for server-side scripting, and Web3 for seamless blockchain integration. Users not only have the ability to contribute to existing campaigns but can also create and manage their own campaigns. The platform facilitates a secure and direct transfer of ethers, ensuring a user-friendly and comprehensive crowdfunding experience.

- **Crypto Tracker** 🔗 – Developed a Crypto Tracker application using ReactJS for the frontend and NodeJS for the backend. This powerful combination provides real-time tracking and analysis of cryptocurrency values, offering users a dynamic and responsive platform for staying informed about the crypto market.

- **Warehouse Inventory** 🔗 – Implemented a Warehouse Inventory system using PHP and MySQL, incorporating test user credentials (username: admin, password: admin) for ease of testing. The system allows users to efficiently manage products, add new items, record sales, and generate receipts, providing a convenient testing environment for evaluating functionality and performance.
